

Sl. No.	Name of the Project	Job -ID (To be filled by Admin)	Role	Qualifications	Required Skills	No. of Years Experience	Job description	Required Candidates
1	SFDP		Senior Solution Architect / Designer - 1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field 11+ years of experience in enterprise software development in a highly technical and analytical role At least 3+ years' experience in developing Enterprise Architecture frameworks that align strategy, processes, and IT assets with business goals for large enterprise/public sector/government entities 	<ul style="list-style-type: none"> Expert in advanced software engineering concepts (design patterns, object oriented, web services, code generation, and test-driven development) Expert in advanced software engineering concepts (design patterns, object oriented, web services, code generation, and test-driven development) Proven experience formulating IT strategy and setting up IT systems including budgeting, technology selection, & strategy, business proposal and RFP preparation for large enterprises/public sector/government entities. Experience in undertaking Government Process Re-engineering by the line departments for efficient service delivery and improving citizen experiences. Experience in distributed systems and event-driven architecture. Well-honed large-scale design and implementation skills with broad and deep experience in algorithms, service bus, and multi-threaded programming, API integration & management. Understands a variety of metadata management tools. Has successfully designed and maintained metadata repositories for large enterprises to facilitate data driven application development, integration and produce analytics. 	12 to 15 yrs Experience.	<ol style="list-style-type: none"> Understand business requirements and proposing reference architectures and technology solutions. In system architecture, understand individual components including Infra, Software tools, Managed services, Data and define their interfaces. Work with department stake holders to arrive acceptable solutions Guide the team on technical standards for scalability, maintainability and security Develop and communicate application and data standards, guidelines and framework for application development, data integration and data security 	1
2	SFDP		Junior Solution Architect / Designer - 1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field 5+ years of experience in enterprise software development in a highly technical and analytical role At least 3+ years' experience in developing Enterprise Architecture frameworks that align strategy, processes, and IT assets with business goals for large enterprise/public sector/government entities 	<ul style="list-style-type: none"> Extensive experience with relational databases (tables, triggers, unions, joins, complex queries, stored procedures), NoSQL (like Cassandra, MongoDB), Apache Ignite and Elasticsearch and XML/SOAP/web services Experience with/good knowledge of secure application development practices, authentication frameworks for SSO etc., Should have knowledge of Continuous integration and continuous deployment (CI/CD) using Git/CVS/SVN and Jenkins. Product knowledge and understanding of IaaS/PaaS platforms including: AWS, Microsoft Azure, Google Cloud, microservices architecture, Linux Container like Docker and orchestration platforms like Kubernetes 	8 to 10 yrs Experience.	<ol style="list-style-type: none"> Understand the business requirements Prepare design document by following application, data standards and guidelines Understand individual components including Infra, Software tools, Managed services, Data and define their interfaces and provide implementation approach Guide the team on technical clarifications Help the team on implementation of non functional requirements like performance, logging, back-up policies etc., 	1

3	SFDP		Technical Lead – Database -1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field. •8+ years of implementation experience of large complex data programs, with deep knowledge in data modelling •At least 3+ years of hands-on experience leading large-scale database, data warehousing and analytics projects. 	<p>PostgreSQLver 11.X/10.X and later MongoDBver 4.X and later Database Design Principles My SqlVer 8.X/5.X Postgresql PL/pgSQL — SQL Procedural Language Scripting</p>	8 to 12 yrs Experience.	<ol style="list-style-type: none"> 1. Understand the business requirements 2. Design and develop by understanding the database architecture standards and non functional requirements 3. Optimize queries, using various tools to monitor performance, security and fix them 4. Experience in data migrations, ETL Processes, Reporting, Archival and Backup processes 5. Improve performance in SQL operations and corrections 6. Work with team members for integration and testing the overall flow of features 7. Work with teams to create an automated CI/CD pipeline 	1
4	SFDP		Technical Lead – Portal – 1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field. •8+ years of experience in UI and web application development •At least 2+ years of experience as a hands-on UI lead/architect 	<p>Strong JavaScript fundamentals and knowledge of Node or React js, HTML 5, CSS3</p> <ul style="list-style-type: none"> •Experience with UI frameworks such as React, Angular, Vue.js •Good working knowledge of CSS pre-processors, webpack, JSX, and Node.js, task runners •Proficient in view layout and rendering technologies (e.g., responsiveness, progressive enhancement, browser/device support) 	5 to 10 yrs Experience.	<ol style="list-style-type: none"> 1. Understand the business requirements 2. Design and develop by understanding the UI/UX architecture standards and non functional requirements 3. Implement UI features as per design document by following coding standards 4. Work with teams to create an automated CI/CD pipeline 5. Work with team members for system / integration testing 	1
5	SFDP		Technical Lead – Service Integration -1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field. •5+ years of experience in software development in a highly technical and analytical role. 	<p>Mid to advanced level knowledge of Python, SQL and Pyspark is an absolute must</p> <ul style="list-style-type: none"> •Knowledge of Azure, Hadoop 2.0 ecosystems, HDFS, Sqoop, Spark etc. a must •Extensive experience working with Data APIs (Working with RESTful endpoints) •Excellent working knowledge of relational database, MySQL, PostgreSQL etc. •Experience with Complex Data Parsing (Big Data Parser) a must. Should have worked on XML, JSON and other custom Complex Data Parsing formats 	8 to 10 yrs Experience.	<ol style="list-style-type: none"> 1. Understand business requirements 2. Design and develop API specifications using OpenAPI Specifications that are scalable and provide greater security on data. 3. Working closely with development teams to create an automated CI/CD pipeline 4. Support end-to-end management of the APIs over its entire lifecycle 5. Work with team members for system / integration testing 	1
6	SFDP		Technical Lead – Database Integration - 1	<ul style="list-style-type: none"> BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology or related field •8+ years of implementation experience of large complex data programs, with deep knowledge in data modelling •At least 3+ years of hands-on experience leading large-scale database, data warehousing and analytics projects. 	<ul style="list-style-type: none"> •5+ years of experience working with Data APIs (Working with RESTful endpoints) • Experience in databases: PostgreSQL, MySQL • Expertise in visualising and manipulating big datasets • Lead all the processes from data collection, cleaning, and pre-processing and deploying them to production 	8 to 10 yrs Experience.	<ol style="list-style-type: none"> 1. Understand business requirements and different data models in the system 2. Lead data collection, cleaning, pre-processing and deploying in the production 3. Define data transition, consumption validation strategies 4. Work with teams to create an automated CI/CD pipeline 5. Work with team members for system / integration testing 	1

7	SSP	SE/SA	Senior Business Analyst	<ol style="list-style-type: none"> 1. BE / ME / MCA 2. 8 to 10 years of industry experience. 3. Previous experience in Business / Requirements Analysis. 	<ol style="list-style-type: none"> 1. Proven experience in eliciting requirements, process documentations and testing. 2. Fundamental analytical and conceptual thinking skills. 	8 to 10	<ol style="list-style-type: none"> 1. Understanding business requirements. 2. Help design, document and maintain system processes. 3. Define configuration specifications and business analysis requirements. 4. Should influence stakeholders and determine acceptable solutions. 5. Perform quality assurance testing of the completed module / solution to ensure that it adheres to the business requirements. 	1
8	SSP	CEET	Senior Application & Systems Architect (PERN stack)	<ol style="list-style-type: none"> 1. BE / ME / MCA in IT / CS. 2. 11 to 15 years of industry experience. 3. Industry standard certifications is preferred. 	<ol style="list-style-type: none"> 1. Extensive working knowledge of computer systems, operating systems, system security, database management, web platforms, cybersecurity, open source technologies and enterprise stacks like Java, Dot net. 2. Experienced in assessing, designing, development, and deployment of large applications mandatorily in PERN stack and also good to have in other open source technologies and enterprise stacks like Java, Dot net. 3. Proven experience and ability to use a wide variety of software solutions for business problems / challenges. 4. Fundamental analytical and conceptual thinking skills. 	11 to 15	<ol style="list-style-type: none"> 1. Understanding business requirements. 2. Help design, document and maintain system processes. 3. Define configuration specifications and business analysis requirements. 4. Should influence stakeholders and determine acceptable solutions. 5. Perform quality assurance testing of the completed module / solution to ensure that it adheres to the business requirements. 	1
9	SSP	SA/SE	Full Stack Developers – (PERN)	<ol style="list-style-type: none"> 1. BE / ME / MCA in IT / CS. 2. 6 to 10 years of industry experience as a software developer in PERN stack. 	<ol style="list-style-type: none"> 1. Experienced in designing, development, and deployment of applications using PERN stack. 2. Knowledge of multiple front-end languages and libraries (e.g., HTML/ CSS, JavaScript, XML, jQuery). 3. Knowledge of multiple back-end languages (preferably Python) and JavaScript frameworks (preferably React, Node.js). 4. Familiarity with databases (preferably MySQL, PostgreSQL), web servers (e.g., Apache) and UI/UX design 5. Experience in bug fixing, impact analysis for change requests, etc. 	6 to 10	<ol style="list-style-type: none"> 1. Ability to develop clean, efficient software code basis the specifications in design documents and understanding the business & technical requirements. 2. Design client-side and server-side architecture and write effective APIs and build with a responsive design. 3. Testing and deploying programs and systems in staging & production environments. 4. Ability to troubleshoot, debug and upgrade existing software to adapt it to new hardware, improve its performance, or upgrade interfaces. 5. Work with departments on technical issues and help in maintenance of the application / system. 	2

10	UMIS	SA/SE	Full Stack Developers – (PERN)	<p>1. BE / ME / MCA in IT / CS.</p> <p>2. 6 to 10 years of industry experience as a software developer in PERN stack.</p>	<p>1. Experienced in designing, development, and deployment of applications using PERN stack.</p> <p>2. Knowledge of multiple front-end languages and libraries (e.g., HTML/ CSS, JavaScript, XML, jQuery).</p> <p>3. Knowledge of multiple back-end languages (preferably Python) and JavaScript frameworks (preferably React, Node.js).</p> <p>4. Familiarity with databases (preferably MySQL, PostgreSQL), web servers (e.g., Apache) and UI/UX design</p> <p>5. Experience in bug fixing, impact analysis for change requests, etc.</p>	6 to 10	<p>1. Ability to develop clean, efficient software code basis the specifications in design documents and understanding the business & technical requirements.</p> <p>2. Design client-side and server-side architecture and write effective APIs and build with a responsive design.</p> <p>3. Testing and deploying programs and systems in staging & production environments.</p> <p>4. Ability to troubleshoot, debug and upgrade existing software to adapt it to new hardware, improve its performance, or upgrade interfaces.</p> <p>5. Work with departments on technical issues and help in maintenance of the application / system.</p>	1
11	UMIS	ASE/ASA	Business Analyst	<p>1. BE / ME / MCA</p> <p>2. 6 to 8 years of industry experience.</p> <p>3. Previous experience in Business / Requirements Analysis.</p>	<p>1. Proven experience in eliciting requirements, process documentations and testing.</p> <p>2. Fundamental analytical and conceptual thinking skills.</p>	6 to 8	<p>1. Understanding business requirements.</p> <p>2. Help design, document and maintain system processes.</p> <p>3. Define configuration specifications and business analysis requirements.</p> <p>4. Should influence stakeholders and determine acceptable solutions.</p> <p>5. Perform quality assurance testing of the completed module / solution to ensure that it adheres to the business requirements.</p>	1
12	AI ML	CEET	AI ML Engineer - Computer Vision	<p>BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology/ or related field.</p>	<p>Build end-to-end Computer Vision system architectures (for ML)</p> <p>Develop, optimize, evaluate, deploy and maintain ML models such as object detectors and object classifiers.</p> <p>Design, develop and maintain infrastructure for ML model training and evaluation.</p> <p>Design, develop, test, deploy, maintain and improve ML models/infrastructure and software that uses these models.</p> <p>Analyze field data to identify areas of possible improvement or enhancement of ML solutions.</p> <p>Hands-on experience in building, deploying, and improving Computer Vision and Machine Learning models and algorithms</p> <p>Knowledge in image processing, object classification and detection, object tracking</p> <p>Working knowledge is pre-trained ML architectures (eg, ResNet, MobileNet, YOLOv5, etc)</p> <p>Extensive data modeling, preprocessing and data architecture skills</p> <p>Build Data Pipelines & Platform to operationalize Machine Learning (ML) models at scale</p> <p>Proficiency with a deep learning framework such as TensorFlow, Keras or PyTorch) and libraries (like scikit-learn, Pandas and Numpy)</p> <p>Proficiency with Python and basic libraries for machine learning.</p>	3 +	<p>Develop machine learning pipeline</p> <p>Select appropriate datasets and data representation methods</p> <p>Run machine learning tests and experiments</p> <p>Perform statistical analysis and fine-tuning using test results</p> <p>Train and retrain systems when necessary</p> <p>Experience with Git based version control</p> <p>Extend existing ML libraries and frameworks</p> <p>Keep abreast of developments in the field</p> <p>Research and implement MLOps tools, frameworks and platforms for our Data Science projects.</p>	1

13	AI ML	CEET	AI ML Engineer - Natural language Processing	BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology/ or related field.	<p>Designing and developing NLP applications Using effective text representation techniques and classification algorithms Proven experience as an NLP Engineer or similar role Understanding of NLP techniques for text representation, semantic extraction techniques, data structures and modeling Working knowledge on pretrained NLP Models (ULMFiT, Transformer, BERT etc) Ability to effectively design software architecture Deep understanding of text representation techniques (such as n-grams, bag of words, sentiment analysis etc), statistics and classification algorithms</p> <p>Proficiency with a deep learning framework such as TensorFlow, Keras or PyTorch) and libraries (like scikit-learn, Pandas and Numpy) Proficiency with Python and basic libraries for machine learning. Proficiency with IDEs – Jupyter Notebook, Spyder, Anaconda environments. Familiarity with Linux (Centos and Ubuntu) Ability to select hardware to run an ML model with the required latency Excellent communication skills Ability to work in a team Outstanding analytical and problem-solving skills</p>	3 Years 3 - 5 Years	<p>Develop machine learning pipeline Select appropriate datasets and data representation methods Run machine learning tests and experiments Perform statistical analysis and fine-tuning using test results Train and retrain systems when necessary Experience with Git based version control Extend existing ML libraries and frameworks Keep abreast of developments in the field Research and implement MLOps tools, frameworks and platforms for our Data Science projects.</p>	1
14	AI ML	CEET	AI ML Engineer - MLOPS	BE / B Tech / MCA / MSc / ME / M Tech in Computer Science/Information Technology/ or related field.	<p>Wide experience with Kubernetes is a must have. Experience in operationalization of Data Science projects (MLOps) using at least one of the popular frameworks or platforms (e.g. Kubeflow, AWS Sagemaker, Google AI Platform, Azure Machine Learning, DataRobot, DKube). Good understanding of ML and AI concepts. Hands-on experience in ML model development. Proficiency in Python used both for ML and automation tasks. Experience in CI/CD/CT pipelines implementation (Github Actions, Jenkins) Experience in Workflow scheduling tools like Apache Airflow Monitoring Data Pipelines like Prometheus, Sentry etc. Knowledge on Infrastructure Provisioning using Terraform. Experience with cloud platforms - preferably AWS - would be an advantage.</p> <p>Proficiency with a deep learning framework such as TensorFlow, Keras or PyTorch) and libraries (like scikit-learn, Pandas and Numpy) Proficiency with Python and basic libraries for machine learning. Proficiency with IDEs – Jupyter Notebook, Spyder, Anaconda environments. Familiarity with Linux (Centos and Ubuntu)</p>	5 5-8 Years	<p>Develop machine learning pipeline Select appropriate datasets and data representation methods Run machine learning tests and experiments Perform statistical analysis and fine-tuning using test results Train and retrain systems when necessary Experience with Git based version control Extend existing ML libraries and frameworks Keep abreast of developments in the field Research and implement MLOps tools, frameworks and platforms for our Data Science projects.</p>	1

15	AI ML	CEET	Data Scientist	BE/Mtech/ME in Computer Science, Engineering or relevant field; graduate degree in Data Science or other quantitative field is preferred; 8+ years of experience in the industry; 3+ years of Hands on experience in the related field	<p>Proven experience as a Data Scientist or Data Analyst</p> <p>Experience in data mining</p> <p>Understanding of machine-learning and operations research</p> <p>Knowledge of R, SQL and Python; familiarity with Java or C++ is an asset</p> <p>Experience using business intelligence tools (Seaborn, ggplot, matplotlib) and data frameworks (e.g. Hadoop)</p> <p>Knowledge of advanced statistical techniques and concepts (regression, properties of distributions, statistical tests and proper usage, etc.) and experience with applications.</p> <p>Analytical mind and business acumen</p> <p>Strong math skills (e.g. statistics, algebra)</p> <p>Problem-solving aptitude</p> <p>Excellent communication and presentation skills</p>	5+	<p>Identify valuable data sources and automate collection processes</p> <p>Undertake pre-processing of structured and unstructured data</p> <p>Analyse large amounts of information to discover trends and patterns</p> <p>Build predictive models and machine-learning algorithms</p> <p>Combine models through ensemble modelling</p> <p>Present information using data visualization techniques</p> <p>Propose solutions and strategies to business challenges</p> <p>Collaborate with engineering and product development teams</p>	1
16	GRAINS	CEET	Senior Project Management	B.E	<p>10+ years of experience in enterprise software development in a highly technical and analytical role</p> <p>At least 5+ years' experience in leading/managing large full life cycle software development projects</p> <p>Experienced in driving the architecture, design & development of large enterprise class software systems.</p> <p>Significant experience in Agile Project Management implementation using agile methodologies (Iterative, Scrum, Kanban). Certifications in Agile methodologies such as CSM/A-CSM/CSP-SM is highly desirable.</p> <p>Familiar with Sprint Planning, User Stories, Release Planning, Scrum Ceremonies Managing projects, Facilitating Requirements Gathering sessions.</p> <p>Able to manage partners through clear understanding and ability to apply the concepts of risk management, conflict management, stakeholder management and change management.</p> <p>Proven ability to lead, monitor and motivate multiple software engineering teams</p> <p>Experience in designing/managing projects adopting Continuous Integration and Continuous Delivery methodologies</p> <p>Knowledge of/experience with information/product security standards is highly desirable</p> <p>Knowledge of emerging technologies such as Artificial Intelligence/Blockchain/Data Analytics is highly desirable</p>	10+	<p>Responsible for the overall software development life cycle.</p> <p>Management and execution against project plans and delivery commitments</p> <p>Coordinate across cross-functional projects, proactively identifying dependencies and risks between different projects</p> <p>Effectively manage Sprints within schedule and to excellent quality standards</p> <p>Conduct Release Readiness reviews, Milestone Reviews, and Business Go/No-Go reviews</p> <p>Maintains a release repository and manages key information such as build and release procedures, dependencies, and notification lists</p> <p>Continually work towards making improvements in the process</p> <p>Ability to quickly understanding business requirements and proposing reference architectures and technology solutions.</p> <p>Ability to drive discussions with senior personnel regarding trade-offs, best practices, project management and risk mitigation.</p> <p>Ability to develop innovative solutions to complex business and technology problems.</p> <p>Excellent leadership and interpersonal skills</p> <p>Strong verbal and written communication</p>	1

17	GRAINS	SSA/SSE	DB Architect	B.E	<p>15+ years of experience of IT platform implementation in a highly technical and analytical role with at least 5 years of experience leading teams. The ideal candidate will have atleast 10+ years of experience with data technologies including big data, analytics, OLTP, AI/Data Models as well as information management, data warehouse, and business analytics functions, preferably in high transaction-oriented, at scale environments.</p> <p>Experience in development and/or DBA experience in Relational Database Management Systems (RDBMS) such as DB2, Oracle, SQL Server, MySQL and/or Postgres, MPP databases (Teradata etc.),.</p> <p>Experienced in optimal design and analysing complex distributed production deployments in Hybrid cloud environment and use of serverless managed services. Strong understanding of modern data ingestion/curation/wrangling tools/technologies such as Informatica suite, Talend suite etc., BI tools such as Tableau/qlikview</p> <p>Experienced in/deep understanding of design and implementation of enterprise data models and metadata structures. Understanding of different data modelling techniques such as Relational modelling, Dimensional modelling, Data Vault, etc.</p> <p>Experienced in/deep knowledge of the design and development of ETL code to load and transform the source</p>	15+	<p>Build and maintain a scalable, flexible, extensible data architecture and platform that drives e-governance across the departments. Design, build and maintain scalable and extensible data processing components (Batch and Real-time) for Data Ingestion, Data Transformation, Data Curation, Data Cataloguing, and Data Security, and Data Integrity.</p> <p>Build and maintain appropriate systems and storage for efficient Data lifecycle management - databases, data marts, data lakes, data warehouses and archives.</p> <p>Lead & manage a team of Database Engineers, Data Analysts and software developers</p> <p>Create and execute a data strategy for data driven e-governance and articulate to all stakeholders.</p> <p>Interact with the departments to understand the types of information and data needed to support their efforts</p> <p>Interact with departments and other stakeholders to support design & use of applications and data mining tools for effective real time reporting and analytics.</p> <p>Track, analyse and develop metrics to identify trends and patterns within the existing data as</p>	1
18	GRAINS	CEET	Tech Lead API Development	B.E	<p>15+ Years of Software development experience</p> <p>Working Experience in developing REST API using leading edge platform such as FASTAPI. Knowledge on developing Open API Standards, is a must. Knowledge on OAuth, and other authentication service is mandatory</p> <p>8+ years experiences as a full stack software developer in Java and traditional and cloud native organizations</p> <p>6+ years' experience building API architecture/management for REST APIs, microservices, SOAP, etc.</p> <p>5+ years' experience building and managing Microservices in AWS or other cloud platform</p> <p>Experience developing serverless applications</p> <p>Demonstrated experience with CI/CD processes & technologies</p> <p>Demonstrated performance of threat modeling, risk assessment techniques, code reviews.</p> <p>Experience working with document storage solutions such as DynamoDB, MongoDB, ElasticSearch, etc.</p> <p>Experience using SDLC tools such as JIRA, Confluence, BitBucket or other Git based source control.</p>	12+	<p>Collaborate with cross departmental enterprise stakeholders to design and develop solutions in a Hybrid environment (AWS, Azure, and On-Prem infrastructure)</p> <p>Evaluate, recommend, and implement auto-scaling compatible cloud/onprem architecture</p> <p>Working closely with development teams to create an automated CI/CD pipeline</p> <p>Design systems and programs to meet complex business needs and create appropriate technical documentation to support project delivery and support plans</p> <p>Design and develop API specifications using OpenAPI Specifications that are scalable and provide greater security on data.</p> <p>Support end-to-end management of the APIs over its entire lifecycle</p>	1

19	GRAINS	ASE/ASA	DBA/DB Engineers	BE / B Tech / MCA / MSc / ME / M Tech in Computer	<p>PostgreSQLver 11.X/10.X and later</p> <p>MongoDBver 4.X and later</p> <p>Database Design Principles</p> <p>My SqlVer 8.X/5.X</p> <p>Postgresql PL/pgSQL — SQL Procedural Language Scripting</p>	5+	<p>Write and optimize queries, have enough experience in using various tools to monitor performance, security and fix them</p> <p>Has experience in data migrations, ETL Processes, Reporting, Archival and Backup processes</p> <p>Identify bottlenecks and improve performance in SQL operations and corrections</p> <p>Monitor production logs, systems usage & operations of the production and staging environments databases</p> <p>Ability to technically troubleshoot, diagnose, isolate and correct data, long running queries, debug dead lock scenarios and database issues</p> <p>Liaise with developers to improve applications and derive and establish best practices</p> <p>Gather user requirements and identify new features</p> <p>Develop technical and training manuals</p> <p>Provide data management support to users</p> <p>Research and suggest usage of new feature's in the application Code</p> <p>Ability to do Data Modelling</p> <p>Physical Schema design for given Database</p> <p>Writing optimized SQL queries for integration with other applications</p> <p>Creating database triggers for use in</p>	2
20	GRAINS	SA/SE	Full Stack Developers Web	BE / B Tech / MCA / MSc / ME / M Tech in Computer	<p>Must have 10+ Years hands-on experience with Java, Spring Boot & Hibernate, or MEAN/MERN Stack development.</p> <p>Minimum 5+ Years of experience in managing teams</p> <p>Must have good experience in Front End technologies (Angular 2/4/6, React Js)</p> <p>Must have good experience in Node JS</p> <p>Demonstrate skills in problem-solving and decision-making</p> <p>Good understanding of AJAX, JSON objects and JavaScript DOM manipulation Techniques</p> <p>Experience in creation of reusable Angular reusable components</p> <p>Experience in developing Angular application with good performance and scalable features</p> <p>Hands-on Development expertise in creation of common frameworks and modules for reusability.</p> <p>Must have experience in Frond end development (HTML, CSS3, JavaScript, ES6) and back end development (Nodejs, Reactjs).</p> <p>Experience in Kubernetes is an added advantage.</p> <p>Experience in Bundling tools (e.g., Webpack)</p> <p>Familiarity or interest in learning more about common tools used in interactive storytelling, such as: JavaScript libraries (e.g., Chart.jsD3.js, Three.js)</p> <p>JavaScript A.P.Ls (e.g., Canvas or WebGL)</p> <p>Mapping tools, such as Mapbox</p>	5+	<p>Work with a scrum team in an agile environment to deliver software release sprints, on-time, with a focus on quality.</p> <p>Be open for hands-on coding & individual responsibilities.</p> <p>Work with business analysts and user communities to understand business requirements.</p> <p>Perform analysis and documentation for system design as well as on-going documentation of development</p> <p>Estimating the development efforts</p> <p>Involve in researching innovative solutions for challenging technical problems.</p> <p>Be proficient in all phases of the software development lifecycle including analysis, design, development, testing, implementation and support.</p> <p>Communicate effectively with the team, and users.</p> <p>Must have excellent verbal and written communication skills</p> <p>Conduct Code Reviews for early detection of defects and code quality</p> <p>Be able to prioritize and multi-task effectively.</p> <p>Support the testing phase (System Testing, SIT, UAT, Non-Regression Testing) and ensure</p>	1

21	GRAINS	SA/SE	Full Stack Developers - Mobile IOS/ Android	BE / B Tech / MCA / MSc / ME / M Tech in Computer	<p>Proven work experience as a Mobile developer</p> <p>In-depth knowledge and experience of at least one programming language like Swift, Java, React Native iOS</p> <p>Familiarity with native build tools, like XCode, Gradle, Android Studio.</p> <p>Experience with third-party libraries and APIs</p> <p>Implement pixel perfect UIs that match designs.</p> <p>Release applications to the Apple and Google Play stores.</p> <p>Work with native modules when required.</p> <p>Good experience on large, complex systems.</p> <p>Experience in Flutter is an added advantage.</p> <p>Knowledge of Location Services, Maps, and other common Android/IOS libraries</p> <p>Solid understanding of the full mobile development life cycle</p> <p>Experience on web service integration (SOAP, REST, JSON, XML)</p> <p>Deep understanding of cross-Device, browser & cross-platform compatibility issues and ways to address them.</p>	5+	<p>Responsible for the end-to-end Mobile Application Development Lifecycle (concept, design, develop, test, release, and support)</p> <p>Develop fully functional mobile applications by writing clean code</p> <p>Gather requirements and suggest solutions for various departments</p> <p>Brainstorm the ideas and work closely with UI/UX professionals to bring out cutting edge mobile experience.</p> <p>Write unit and UI test cases to identify malfunctions</p> <p>Troubleshoot and debug to optimize performance</p> <p>Write / Integrate REST APIs</p> <p>Be highly autonomous, especially be able to transform fuzzy, complex, and various requirements into clear specifications, plan for their implementation, and delivery.</p> <p>Liase with departments or other development teams to implement new features</p>	1
22	e-Office		Sr. Server Administrator	<p>*BE / ME / MCA or equivalent.</p> <p>*Should have atleast 3+ years of server administrator experience in LINUX platform.</p> <p>*Candidate should have sound knowledge on database concepts, Networking, functionalities of web and application servers.</p> <p>*Ideal candidate should have complete knowledge on virtualization (Cloud).</p>	<ul style="list-style-type: none"> •Relevant experience leading teams, •managing secure applications in different server setup (Physical/ Cloud/ HCI) •Automation and scripting •Security and Monitoring •Access Management •Trouble shooting •Structured Query Language (SQL) database management skills •Problem-solving skills •Accuracy and attention to detail •Adept at queries, writing reports, and making presentations •Team-working skills •Verbal and Written communication skills <p>* Proficiency in Tamil is a plus</p>	5+	<ul style="list-style-type: none"> •Working with NIC, CDAC, ELCOT & TNeGA to deploy eOffice applications in servers •Continuous monitoring of key parameters of eoffice server clusters hosted in SDC and DRC •Providing various business and technical solutions to the issues in eOffice ecosystem. •Co-ordination with NIC Delhi, SDC-ELCOT team for remote access •Developing scripts to automate process •Developing APIs to facilitate direct monitoring of key parameters by senior officials •Leading the Server Administrators/ Database Administrators. •Performing maintenance, migration, and upgrading hardware and software operations. •Ensuring the security of servers. •Documenting processes and reporting process •Working on other e-Governance initiatives of TNeGA as required 	1

23	e-Office		Server Administrator	<p>*BE / ME / MCA or equivalent. *Should have atleast 2+ years of server administrator experience in LINUX platform. *Candidate should have sound knowledge on database concepts, functionalities of web and application servers. *Ideal candidate should have complete knowledge on virtualization (Cloud).</p>	<ul style="list-style-type: none"> •Relevant experience in managing secure applications in different server setup (Physical/ Cloud/ HCI) •Automation and scripting •Security and Monitoring •Access Management •Trouble shooting •Structured Query Language (SQL) database management skills •Problem-solving skills •Accuracy and attention to detail •Adept at queries, writing reports, and making presentations •Team-working skills •Verbal and Written communication skills <p>* Proficiency in Tamil is a plus</p>	2+	<ul style="list-style-type: none"> •Working with NIC, CDAC, ELCOT & TNeGA to deploy eOffice applications in servers •Continuous monitoring of key parameters of servers clusters hosted in SDC and DRC •Providing various business and technical solutions to the issues in eOffice ecosystem. •Co-ordination with NIC Delhi, SDC-ELCOT team for remote access •Developing scripts to automate process •Developing APIs to facilitate direct monitoring of key parameters by senior officials •Performing maintenance, migration, and upgrading hardware and software operations. •Ensuring the security of servers. •Documenting processes and reporting process •Working on other e-Governance initiatives of TNeGA as required 	1
24	DBT	DBTTPM	Team Lead	<p>*BE / ME / MCA or equivalent . *Should have atleast 5+ years of Techno functional experience in Payments, Banking, FinTech or equivalent domain dealing with high volume and frequency of transactions. *Should have leadership experience and have led a team of atleast 15 members *Experience dealing with government or semi-government projects would be ideal *Verbal and reading proficiency in Tamil is a plus</p>	<ul style="list-style-type: none"> •Relevant experience leading teams building highly secure and highly available applications •Ability manage a team of developers, analysts and architects to deliver the end solution •Should be able to gauge and manage expectations of the government departments and translate requirements into scope, features and specs for the DBT platform •Leverage the technical team to deliver a highly available, secure and scalable platform •Problem-solving skills •Accuracy and attention to detail •Adept at queries, writing reports, and making presentations •Team-working skills •Verbal and Written communication skills <p>* Proficiency in Tamil is a plus</p> <p>•Should be able to draft tenders, proposals, SRS, FRS and other relevant documentation required for executing the projec</p>	10+	<ul style="list-style-type: none"> •Working with government departments, TNeGA and dev team to design, develop and deliver the a highly robust citizen services delivery platform The candidate would lead the technical team •Providing technical thought leadership and recommend emerging and latest trends which maybe incorporated for building future safe platforms •Working with various stakeholders including but not limited to government departments, PSUs, citizens and others to build and operate the platform •Leading and managing the team responsible for delivering and operating the platform •Working on other e-Governance initiatives of TNeGA as required 	1
